**TITLE:**

EVALUATION OF CALTRANS DISTRICT 10 AUTOMATED WARNING SYSTEM: YEAR TWO PROGRESS REPORT

**ABSTRACT:**

The Caltrans Automated Warning System (CAWS) entered service in November 1996. The system includes 36 speed monitoring sites, 9 weather stations, 9 DMS and TMC computer systems. The independent evaluation was carried out by researchers at the University of California. The report bibliography includes summaries of all highway fog warning systems for which published information was available.
